

Environmental Noise Surveys and Assessments

With in-house technical expertise, SOCOTEC can undertake baseline noise surveys and impact assessments.

SOCOTEC has developed significant experience in providing noise consultancy services to clients requiring assistance with noise related planning and compliance obligations. Our MIOA-qualified noise consultants have a proven track record in the delivery of noise assessments for a range of development scenarios, including:

- › Major infrastructure projects
- › Waste management facilities
- › Quarries and mineral sites
- › New housing developments
- › Leisure and recreation
- › Commercial developments and offices
- › Industrial and manufacturing sites

ACOUSTIC SERVICES

SOCOTEC can offer market-leading capabilities to deliver a range of acoustic based services, including:

- › Baseline noise surveys
- › Compliance based noise monitoring, including BS 5228-1:2009+A1:2014 (Code of practice for noise and vibration control on construction and open sites)
- › Long term monitoring using web-enabled instrumentation
- › Noise reduction and mitigation
- › Rating Level Assessment (BS 4142: 2014 Methods for Rating and Assessing Industrial and Commercial Sound)
- › Acoustic modelling

SOCOTEC's acoustic modelling capability can accurately replicate even the most complex of acoustic environments. These are used to prepare accurate, concise and clearly presented acoustic reports to fully satisfy the client and regulators requirements.

By liaising directly with the regulator on behalf of clients, SOCOTEC can ensure the best outcome is delivered for all parties. Our team offers a wide planning and permitting package which includes noise assessment, air quality assessment, ecology, contaminated land and flood risk.
