

SOCOTEC

Consultancy & On Site Laboratory Services

By combining consultancy and design services with site investigation and specialist site services, SOCOTEC can support your project with complete laboratory and site investigation packages.

As a leading testing, inspection and compliance service provider, SOCOTEC can offer fully integrated services relating to all contaminated land, geotechnical, waste management, site survey and environmental requirements for clients across a broad range of sectors.

Our teams of experienced consultants and technicians are on hand to provide support and effective management of complex multifaceted requirements. SOCOTEC takes pride in being at the forefront of innovation and market developments. Our combined consultancy and site teams, backed up by in house chemical analysis and geotechnical testing laboratories, are an example of our coordinated approach to a complex requirement.

BENEFITS OF SOCOTEC'S SERVICES

- Cost effective with integrated design and data gathering for all geotechnical and environmental requirements
- Pragmatic approach to environmental risk assessment and design to develop cost effective options for regulatory approval
- Avoids supply chain mark up and programme delays with a single source provider for advisory services, site investigation, survey and laboratory services
- Extensive experience of regulatory negotiations and providing positive outcomes for clients
- Innovative approach to problem solving with a unique range of site survey and investigation capabilities
- Access to highly specialist technical input via a project manager with an understanding of the client's requirements and objectives

CONSULTANCY AND ON-SITE LABORATORY SERVICES

Our integrated cost effective and investigation services ensure that all clients have the right advice for their project from the onset. Our integrated interpretive reports include consideration of all planning and permit requirements, as well as designers' data requirements, such as environmental and geotechnical parameters.

Throughout a construction, development or waste project life cycle, SOCOTEC provides the following integrated services:

Advisory Services:

- Contaminated land consultancy
- Waste management advice and waste classification
- Geotechnical and civil engineering design and advice
- Environmental permitting consultancy
- Hydrogeological risk assessment
- Environmental risk assessment
- Asbestos in soils advice
- Sustainability auditing including biomass
- Environmental management and auditing
- Due diligence auditing
- Planning & Environmental Impact Assessments (EIA)
- Soil and landscape science

Site and Laboratory Services:

- Mobile chemical analysis laboratory
- Utility surveys
- Topographic surveys
- Geophysical and UXO surveys (on and off shore)
- Full in house site investigation capability
- Environmental and occupational monitoring
- Multitasking site sampling and monitoring
- In-situ testing
- Resident engineer and site chemist services
- Geotechnical and materials laboratories
- Environmental chemistry, asbestos and nuclear laboratories
- Data management specialists
