

SOCOTEC

Legionella and Water Hygiene Consultancy Services

Whether you want a complete water hygiene service, or have specific legionella or pseudomonas management and control requirements, SOCOTEC can provide you with the service you need.

As an independent consultancy SOCOTEC can offer clients a full range of solutions to meet water hygiene and risk management needs. With a diverse range of clients, across the UK and Ireland, we can provide you with a bespoke service giving you complete peace of mind. Our team of experienced and knowledgeable consultants have worked on a variety of complex and simple water systems within healthcare, commercial and industrial buildings.

Legionella risk assessments

SOCOTEC offers a complete range of individually designed solutions to ensure you comply with the requirements of the Health and Safety Executive's Approved Code of Practice (ACoP) L8 and Technical Guidance HSG274 as well as other best practice guidance.

Our risk assessments have been developed with our clients in mind, providing you with an independent, detailed and easy to understand working document.

LEGIONELLA AND WATER HYGIENE CONSULTANCY

How you manage the risk from legionella, as identified in the risk assessment, can make all the difference in having a safe or unsafe water system. SOCOTEC offers a range of legionella and water hygiene management and control solutions:

Training

SOCOTEC can provide you with bespoke Legionella training courses at your site. Our Responsible Persons and General Awareness training courses are both CIBSE CPD approved. We can also offer CIBSE CPD approved courses in cooling water and closed system treatment and management.

Microbiological and chemical sampling and analysis

We have UKAS accredited laboratories* at our Bretby, Cirencester and East Kilbride offices. We can offer UKAS accredited microbiological analysis for legionella, E.coli, coliforms, total viable counts (TVC) and Pseudomonas aeruginosa. Chemical analysis of water systems can be undertaken on site or at our laboratories.

Auditing

The ACoP L8 states that control procedures must be reviewed on a regular basis. SOCOTEC can undertake an independent audit of your Legionella and water quality management and control procedures providing you with an unbiased report and where needed recommendations and guidance.

Water hygiene monitoring

SOCOTEC has field-based teams all over the UK. We can provide you with a tailor-made monitoring programme for cooling tower, domestic hot and cold water systems, evaporative cooling systems and other risk systems.

Site specific log books

Our site specific paper and electronic record keeping systems will help you to demonstrate control of your water systems.

Water management written scheme documentation (policy and procedural documents)

Poor management, lack of training and poor communication have all been contributing factors to outbreaks of Legionnaires' disease. SOCOTEC can work with you in designing, preparing and implementing your bespoke policy and procedural documents.

Pseudomonas aeruginosa risk management assessment

In addition to Legionella consultancy SOCOTEC can offer Pseudomonas risk assessments, the preparation of a water safety plan and Pseudomonas aeruginosa sampling.

MORE ABOUT OUR SERVICES

Your water is safe in our hands. For more information or advice on the best service for you, please call 0845 603 2112 or email salesuk@socotec.com
