

Construction Services

Site Investigation

Marine Management Organisation (MMO) Approved Laboratory

Operational Support

Dredging Disposal License Analysis (UK & Ireland Regulatory Authority)

Offshore Laboratory Services (Oil & Gas, Renewables, Pipeline & Cables)

Decommissioning

Marine Services

Supporting services for marine, ports and harbours

CONSTRUCTION

- > Concrete testing
- > Construction materials testing
- > Pile & foundation testing
- > Metallurgical mechanical testing
- > Paints/coating testing
- > Soil & structure monitoring

DREDGING

- > Marine licensing analytical chemistry
- > MMO approved laboratory
- > Ecotoxicity testing services
- > Core classification & WAC testing
- > Disposal advice
- > Bathing water analysis
- > Antifouling & booster biocide analysis

EARTHWORKS

- > In situ testing
- > Asbestos in soil analysis and air monitoring
- > Soil/aggregate testing
- > Chemical analysis of water & soil
- > Waste classification
- > Materials managing planning and advice
- > Remediation planning & verification
- > Air / noise / vibration / water monitoring
- > Bespoke data management
- > Bespoke site laboratories

OVERWATER & TERRESTRIAL SITE INVESTIGATION

- > Borehole drilling
- > Geotechnical investigation
- > Geo-environmental testing
- > Land surveys
- > Geophysical surveys
- > Contaminated land investigation and consultancy
- > Bathymetric surveys/profiling
- > 3D laser scanning
- > Asbestos in soil analysis and air monitoring

OPERATIONAL SUPPORT

- > Air Environmental permit consultancy
- > Effluent monitoring
- > Stack emissions monitoring
- > Asset inspection
- > Occupational health
- > Environmental incident response
- > Asbestos re-inspections
- > Failure investigation
- > Oil testing
- > Produced waters analysis

DECOMMISSIONING

- > Demolition waste characterisation
- > Asbestos surveys & testing
- > WRAP protocol testing
- > Remediation design & verification
- > Environmental monitoring
- > Asbestos removal project management and air monitoring
- > Hazardous material surveys
